June 2016

Dear Ben,

Welcome to our summer edition.

Alliance Contract Pharma announces that one of its customers, PaxVax, has received FDA approval for Vaxchora, a single-dose oral, live attenuated cholera vaccine, indicated for use in adults 18-64 years of age.

Vaxchora is the only vaccine available in the U.S. for protection against cholera and the only single-dose vaccine for cholera currently licensed anywhere in the world. Two non-bacterial components are manufactured by ACP.

ACP has supported PaxVax in the development, process optimization and validation for these Vaxchora components and will continue to supply commercial requirements. Ben Reed, VP of Manufacturing at ACP said, "We pride ourselves in working along side our clients to reach their goals. The dedicated, quality driven teamwork between PaxVax and ACP has led to this key success for both companies." Nima Farzan, CEO and President of PaxVax said, "Achieving FDA approval is an important milestone for PaxVax and a testament to our unwavering commitment to producing vaccines of the highest quality. ACP shares this commitment and has been an important partner in bringing Vaxchora to market."

Alliance Contract Pharma is a contract manufacturing and analytical service company that delivers quality driven services to the health
